

**Basel-III --- Pillar-3 disclosures as on 31<sup>st</sup> December - 2021**
**Table DF - 2 : Capital adequacy;**

<b>1. Qualitative disclosure</b>	
<b>1.1 A summary discussion of the bank's approach to assessing the adequacy of its capital to support current and future activities.</b>	
<p>i) The Bank is subject to Capital Adequacy guidelines of RBI, which are based on the framework of Basel Committee on Banking Supervision. As per Basel III guidelines the minimum capital required to be maintained by the Bank is 11.50 percent with minimum Common Equity Tier 1 (CET1) of 8.00% as on December 2021. Stress analysis is conducted on half yearly basis or as required to see the impact on capital adequacy ratio (CAR) in near to medium horizon.</p> <p>ii) The Bank assesses its capital requirement based on business projections and opportunities for growth that are in line with the strategic intent of the Bank. The business projections are mapped to credit, market and operational risks which allows for assignment of regulatory capital besides providing capital headroom to meet growth projections. As part of the Internal Capital Adequacy Assessment Process (ICAAP), Bank also assesses adequacy of capital under stress conditions for gauging the adequacy of capital to support not only three primary risks of credit, market and operational risk but other residual risks like interest rate risk in banking book, liquidity risk, credit concentration risk, strategic risk and reputational risk.</p>	
<b>2. Quantitative Disclosures</b>	Amount in ₹ million
<b>2.1 Capital requirements for credit risk</b>	<b>72547.79</b>
• Portfolio subjected to standardized approach	72547.79
• Portfolios subjected to the IRB approaches	• Nil
• Securitization exposures	• Nil
<b>2.2 Capital requirement for market risk ( under Standardized duration approach)</b>	<b>854.75</b>
• Interest rate risk	478.50
• Foreign exchange risk (including gold)	30.60
• Equity risk	345.65

<b>2.3 Capital requirement for operational risk</b>		<b>6308.65</b>	
• Basic indicator approach:		6308.65	
<b>2.4 Common Equity Tier 1, Tier 1 and Total Capital ratios:</b>

J&K Bank Ltd- Standalone	9.58%	10.97%	12.38%
J&K Bank Ltd- Consolidated	9.57%	10.96%	12.38%

### **Risk Exposure and Assessment**

#### **Structure and Organisation of Risk Management Function**

The Bank's risk governance architecture focuses on key risk areas of credit, market (including liquidity) and operational risk. The quantification of these risks, wherever possible, ensures effective and continuous monitoring and control. The risk management system is overseen by Board of Directors of the bank, with Integrated Risk Management Committee (IRMC), a board level sub-committee entrusted with the overall responsibility of ensuring that adequate structures, policies and procedures are in place for risk management in the Bank. The IRMC of Board is supported by separate Executive level Committees viz, Credit Risk Management Committee (CRMC), Asset-Liability Management Committee (ALCO), Market Risk Management Committee and Operational Risk Management Committee (ORMC) to ensure effective management of credit, market and operational risks respectively. The executive level committees are in turn assisted / supported by respective risk management support groups for credit, operational, market and liquidity risks. These support groups provide support functions to the above committees through analysis of risks and reporting of risk positions and making recommendations as to the level and degree of risks to be undertaken.

Credit Monitoring Division (CMD) has been set up for ongoing monitoring of credit quality of borrowers. Department besides online monitoring of special mention accounts and limit monitoring releases caution list of borrowers at regular intervals based on the Early Warning Signal framework of the RBI.

In terms of enhanced operational risk management framework Bank has formed Zonal Risk Management Committees (ZRMC) which meet at least once in a quarter to discuss all the issues related to Operational/Credit risk and implementation of enhanced risk management framework at the grass root level. Zonal Head, designated Zonal Risk managers and identified business unit heads participate in the meeting.

**Table DF – 3: Credit Risk****General disclosures --- Credit Risk**

**Credit Risk** is the possibility of loss that a bank may be subjected to, on account of changes or deterioration in the credit profile / credit quality of borrowers and counterparties. The Bank is exposed to credit risk through lending and capital market activities. Bank has put in place Board approved comprehensive Credit Risk Management Policy that includes Credit Risk management & Credit Monitoring which aims at ensuring sustained growth of healthy loan portfolio while identifying and managing credit risks, both at transaction and portfolio levels. It lays down the roles and responsibilities, risk appetite, key processes and reporting framework.

The Bank manages its credit risk through following strategies:

- a) Well defined credit risk management structure to identify measure, monitor and control / mitigate credit risk from loan origination to disbursement and post disbursement monitoring has been laid out.
- b) Board approved policy Guidelines for Investments & Trading in Domestic securities of the Bank addresses credit risks related to investment activities undertaken by the Bank, prescribing prudential limits, methods of risk measurement and hedges required in mitigation of risks arising in investment portfolio.
- c) Corporate credit is managed through rating of borrowers and thorough risk vetting of individual exposures at origination and periodic review after sanctioning. Retail credit to individuals and small business is managed through definition of product criteria, appropriate credit filters and subsequent portfolio monitoring.
- d) Industry wise segment ceilings on aggregate lending by the Bank.
- e) Individual borrower wise ceilings on lending as well as borrower group wise lending ceilings linked to the Bank's Tier 1 capital funds.
- f) Bank has comprehensive risk rating system that serves as a single point indicator of diverse risk factors of counterparty and for taking credit decisions in a consistent manner. The credit rating models use a combination of quantitative and qualitative factors that include borrower specific characteristics, industry score etc. to arrive at a 'point in time' view of risk.
- g) Allowing credit exposures as per the credit rating of borrowers upto defined thresholds of risk levels. The approach also includes diversification of credit portfolio rating category wise but within the acceptable risk parameters.

- h) The Bank's entire current business is within India and hence there is no geographic ceiling on lending in India or outside India. Further, there is also no ceiling on lending within a State in India.
- i) A mechanism of clear and well defined delegation of authority operates within the Bank in regard to decision making, which links risk and exposure amount to level of approval.
- j) Regular review of all credit sanctioning powers delegated to various sanctioning levels so as to continuously strengthen the credit processes, and monitoring oversight are undertaken.
- k) Approval processes with respect to credit proposals are preceded by study of risks and preliminary due diligence particularly while sourcing fresh credit accounts.
- l) Credit audit system and loan review mechanism function independently of the credit processing / credit approval system and ensure effective loan monitoring, management / mitigation of credit and operational risks in the loan portfolio.
- m) An appropriate mechanism for ongoing identification, development and assessment of expertise of officials in the area of credit appraisal and credit management function.

**1. Qualitative Disclosures: The general qualitative disclosure requirement with respect to credit risk including:**

**1.1.1 Definition and classification of non-performing assets (NPAs)**

An asset including a leased asset becomes non-performing when it ceases to generate income for the bank. A non-performing asset (NPA) is a loan or an advance where:

- a. Interest and/or installment of principal remain overdue for a period of more than 90 days in respect of a term loan.
- b. The account remains 'out of order' as indicated in paragraph 1.1.2 below, in respect of an Overdraft / Cash Credit (OD/CC).
- c. The bill remains overdue for a period of more than 90 days in case of bills purchased and discounted.
- d. The installment of principal or interest thereon remains overdue for two crop seasons

for short duration crops.

- e. The installment of principal or interest thereon remains overdue for one crop season for long duration crops.
- f. In respect of a securitisation transaction undertaken in terms of the RBI guidelines on securitisation, the amount of liquidity facility remains outstanding for more than 90 days.
- g. In respect of derivative transaction, if the overdue receivable representing positive mark-to-market value of a derivative contract, remains unpaid for a period of 90 days from the specified due date for payment.

An account is also classified as NPA if the interest due and charged during any quarter is not serviced fully within 90 days from the end of the quarter.

**1.1.2 ‘Out of Order’ status:** An account is treated as ‘Out of Order’ if the outstanding balance remains continuously in excess of the sanctioned limit / drawing power for 90 days. In cases where the outstanding balance in the principal operating account is less than the sanctioned limit / drawing power, but there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not enough to cover the interest debited during the same period, these accounts are treated as “out of order”.

**1.1.3 Overdue:** Any amount due to the bank under any credit facility is ‘overdue’ if it is not paid on the due date fixed by the bank.

## 1.2 Discussion of the Bank’s Credit Risk Management Policy.

The Credit Risk Management Policy of the Bank aims at ensuring sustained growth of healthy loan portfolio while evolving a well- defined system to identify measure, monitor and control various risks attached to credit portfolio of the Bank. The policy aims at ensuring consistency and standardization of credit practices. There is a defined credit appraisal & credit approval authority, reporting cum monitoring / follow-up system and loan review mechanism/ credit audit system in place at the Bank.

<b>2. <u>Quantitative Disclosures</u></b>	<b>Amount ₹ million</b>
<b>2.1 Exposure amount after risk mitigation subjected to the standardized approach, amount of bank's outstanding (rated and un-rated) in the following three major risk buckets as well as those that are deducted:</b>	
• Below 100% risk weight	786628.67
• 100% risk weight	353898.70
• More than 100% risk weight	52352.99

**LEVERAGE RATIO**

The Basel III leverage ratio is defined as the ratio of capital measure (the numerator) to exposure measure (the denominator), expressed as a percentage. The leverage ratio is calibrated to act as a credible supplementary measure to the risk based capital requirements.

The capital measure used for the leverage ratio at any particular point in time is the Tier 1 capital measure applying at that time under the risk-based framework. Total exposure measure is the sum of the on-balance sheet exposures, derivative exposures, securities financing transaction (SFT) exposures and off- balance sheet (OBS) items.

$$\text{Leverage ratio} = \frac{\text{Capital Measure (Tier 1 Capital)}}{\text{Exposure Measure}}$$

As on 31.12.2021

Amount in ₹ million
