

## **Basel-III --- Pillar-3 disclosures as on 31<sup>st</sup> March- 2021**

### **Table DF-1: Scope of application :**

The Basel III capital adequacy norms are applicable to Jammu & Kashmir bank Ltd.

<b>Name of the head of the banking group to which the Framework applies.</b>	<b>Jammu and Kashmir Bank Ltd</b>
--	-----------------------------------

Jammu and Kashmir Bank (J&K Bank) is a commercial Bank incorporated on October 1, 1938 and the only scheduled commercial bank owned by Government of Union Territory of J&K.

### **(i) Qualitative Disclosures:**

#### **a. The List of group entities considered for consolidation**

<b>Name of the entity / Country of Incorporation</b>	<b>Included under accounting scope of consolidation (yes / no)</b>	<b>Method of consolidation</b>	<b>Included under regulatory scope of consolidation (yes / no)</b>	<b>Method of consolidation</b>	<b>Reason for difference in the method of consolidation</b>	<b>Reasons, if consolidated under only one of the scopes of consolidation</b>
<b>J&amp;K Bank Financial Services Ltd/ India</b>	<b>Yes</b>	<b>Line By Line Method</b>	<b>Yes</b>	<b>Line By Line Method</b>	<b>Not Applicable</b>	
<b>J&amp;K Grameen Bank / India</b>	<b>Yes</b>	<b>Equity method (35%)</b>	<b>No</b>	<b>Not Applicable</b>	<b>Not Applicable</b>	

b. The List of group entities not considered for consolidation both under the accounting and regulatory scope of consolidation is given below.

Name of the entity / Country of incorporation	Principle activity of the entity	Total balance sheet equity	Percentage of bank's holding in the total equity	Regulatory treatment of bank's investments in the capital instruments of the entity	Total balance sheet assets
---Nil---	---Nil---	---Nil---	---Nil---	---Nil---	---Nil---

(ii) Quantitative Disclosures

c. The List of group entities considered for consolidation as on 31st March 2021:

Name of the entity / country of incorporation	Principal activity of the entity	Total Balance Sheet Equity	Total Balance Sheet Assets
J&K Bank Financial Services Ltd / India	Marketing of Financial Products	₹ 200 million	₹ 354.40 million

d. The aggregate amount of capital deficiencies in all subsidiaries, which are not included in the regulatory scope of consolidation i.e. that are deducted:

Name of the subsidiaries / country of incorporation	Principal activity of the entity	Total balance sheet equity	Percentage of Bank's Holding in the Total Equity	Capital Deficiencies
J&K Grameen Bank / India	Banking Activities	971.63	35%	₹ 2170.00

**e. The aggregate amounts ( e.g current book value) of the bank’s total interests in insurance entities, which are risk weighted:**

<b>Name of the insurance entities</b>	<b>Principal activity of the entity</b>	<b>Total balance sheet equity</b>	<b>Percentage of bank’s holding in the total equity / proportion of voting power</b>	<b>Quantitative impact on regulatory capital of using risk weighting method versus using the full deduction method</b>
<b>Country of incorporation</b>				
PNB Metlife India Insurance Company Ltd / India	Life Insurance Business	₹ 610.8 millions	3.03%	CRAR will reduce by 0.09% under the deduction method

**f. Any restrictions or impediments on transfer of funds or regulatory capital within the banking group-- Not Applicable**

**Table DF - 2 : Capital adequacy;**

<b>1. Qualitative disclosure</b>
<b>1.1 A summary discussion of the bank’s approach to assessing the adequacy of its capital to support current and future activities.</b>
<p>i) The Bank is subject to Capital Adequacy guidelines of RBI, which are based on the framework of Basel Committee on Banking Supervision. As per Basel III guidelines the minimum capital required to be maintained by the Bank is 10.875 percent with minimum Common Equity Tier 1 (CET1) of 7.375% as on March 31, 2021. Stress analysis is conducted on half yearly basis or as required to see the impact on capital adequacy ratio (CAR) in near to medium time horizon.</p> <p>ii) The Bank assesses its capital requirement based on business projections and opportunities for growth that are in line with the strategic intent of the Bank. The business projections are mapped to credit, market and operational risks which allows for assignment of regulatory capital besides providing capital headroom to meet growth projections. As part of the Internal Capital Adequacy Assessment Process (ICAAP), Bank also assesses adequacy of capital under stress conditions for gauging the adequacy of capital to support not only three primary risks of credit, market and operational risk but other residual risks like interest rate risk in banking book, liquidity risk, credit concentration risk, strategic risk and reputational risk.</p>

<b>2. <u>Quantitative Disclosures</u></b>		Amount in ₹ million	
<b>2.1 Capital requirements for credit risk</b>		<b>65770.61</b>	
• Portfolio subjected to standardized approach		65770.61	
• Portfolios subjected to the IRB approaches		Nil	
• Securitization exposures		Nil	
<b>2.2 Capital requirement for market risk (under Standardized duration approach)</b>		<b>930.16</b>	
• Interest rate risk		590.04	
• Foreign exchange risk (including gold)		30.60	
• Equity risk		309.52	
<b>2.3 Capital requirement for operational risk</b>		<b>5841.38</b>	
• Basic indicator approach:		5841.38	
<b>2.4 Common Equity Tier 1, Tier 1 and Total Capital ratios:</b>			
Name of the Entity	Common Equity Tier 1 ratio	Tier 1 ratio	Total capital ratio
<b>J&amp;K Bank Ltd - Consolidated</b>	<b>8.82%</b>	<b>10.27%</b>	<b>12.20%</b>

## **Risk Exposure and Assessment**

<b><u>Structure and Organisation of Risk Management Function</u></b>
<p>The Bank's risk governance architecture focuses on key risk areas of credit, market (including liquidity) and operational risk. The quantification of these risks, wherever possible, ensures effective and continuous monitoring and control. The risk management system is overseen by Board of Directors of the bank, with Integrated Risk Management Committee (IRMC), a board level sub-committee entrusted with the overall responsibility of ensuring that adequate structures, policies and procedures are in place for risk management in the Bank. The IRMC of Board is supported by separate Executive level Committees viz, Credit Risk Management Committee (CRMC), Asset-Liability Management Committee (ALCO), Market Risk Management Committee and Operational Risk Management Committee (ORMC) to ensure effective management of credit, market and operational risks respectively. The executive level committees are in turn assisted / supported by respective risk management support groups for</p>

credit, operational, market and liquidity risks. These support groups provide support functions to the above committees through analysis of risks and reporting of risk positions and making recommendations as to the level and degree of risks to be undertaken.

Credit Monitoring Division (CMD) has been set up for ongoing monitoring of credit quality of borrowers. Department besides real time monitoring of special mention accounts and limit monitoring circulates caution list of borrowers at regular intervals based on the Early Warning Signal framework of the RBI.

In terms of enhanced operational risk management framework Bank has formed Zonal Risk Management Committees (ZRMC) which meet at least once in a quarter to discuss all the issues related to Operational/Credit risk and implementation of enhanced risk management framework at the gross root level. Zonal Head, designated Zonal Risk managers and identified business unit heads participate in the meeting.

### **Table DF – 3: Credit Risk**

#### **General disclosures --- Credit Risk**

**Credit Risk** is the possibility of loss that a bank may be subjected to, on account of changes or deterioration in the credit profile / credit quality of borrowers and counterparties. The Bank is exposed to credit risk through lending and capital market activities. Bank has put in place Board approved comprehensive Credit Risk Management Policy which aims at ensuring sustained growth of healthy loan portfolio while identifying and managing credit risks, both at transaction and portfolio levels. It lays down the roles and responsibilities, risk appetite, key processes and reporting framework.

The Bank manages its credit risk through following strategies:

- a) Well defined credit risk management structure to identify measure, monitor and control / mitigate credit risk from loan origination to disbursement and post disbursement monitoring has been laid out.
- b) Board approved Investment Policy of the Bank addresses credit risks related to investment activities undertaken by the Bank, prescribing prudential limits, methods of risk measurement and hedges required in mitigation of risks arising in investment portfolio.
- c) Corporate credit is managed through rating of borrowers and thorough risk vetting of individual exposures at origination and periodic review after sanctioning. Retail credit to individuals and small business is managed through definition of product criteria, appropriate credit filters and subsequent portfolio monitoring.
- d) Industry wise segment ceilings on aggregate lending by the Bank.

- e) Individual borrower wise ceilings on lending as well as borrower group wise lending ceilings linked to the Bank's capital funds.
- f) Bank has comprehensive risk rating system that serves as a single point indicator of diverse risk factors of counterparty and for taking credit decisions in a consistent manner. The credit rating models use a combination of quantitative and qualitative factors that include borrower specific characteristics, industry score etc. to arrive at a 'point in time' view of risk.
- g) Allowing credit exposures as per the credit rating of borrowers up to defined thresholds of risk levels. The approach also includes diversification of credit portfolio rating category wise but within the acceptable risk parameters.
- h) The Bank's entire current business is within India and hence there is no geographic ceiling on lending in India or outside India. Further, there is also no ceiling on lending within a State in India.
- i) A mechanism of clear and well defined delegation of authority operates within the Bank in regard to decision making, which links risk and exposure amount to level of approval.
- j) Regular review of all credit sanctioning powers delegated to various sanctioning levels so as to continuously strengthen the credit processes, and monitoring oversight are undertaken.
- k) Approval processes with respect to credit proposals are preceded by study of risks and preliminary due diligence particularly while sourcing fresh credit accounts.
- l) Credit audit system and loan review mechanism function independently of the credit processing / credit approval system and ensure effective loan monitoring, management / mitigation of credit and operational risks in the loan portfolio.
- m) An appropriate mechanism for ongoing identification, development and assessment of expertise of officials in the area of credit appraisal and credit management function.

**1. Qualitative Disclosures: The general qualitative disclosure requirement with respect to credit risk including:****1.1.1 Definition of NPA and impaired account**

An asset including a leased asset becomes non-performing when it ceases to generate income for the bank. A non-performing asset (NPA) is a loan or an advance where:

- a. Interest and/or installment of principal remain overdue for a period of more than 90 days in respect of a term loan.
- b. The account remains 'out of order' as indicated in paragraph 1.1.2 below, in respect of an Overdraft / Cash Credit (OD/CC).
- c. The bill remains overdue for a period of more than 90 days in case of bills purchased and discounted.
- d. The installment of principal or interest thereon remains overdue for two crop seasons for short duration crops.
- e. The installment of principal or interest thereon remains overdue for one crop season for long duration crops.
- f. In respect of securities, where interest/principal is in arrears for a period of more than 90 days.

An account is also classified as NPA if the interest due and charged during any quarter is not serviced fully within 90 days from the end of the quarter.

**1.1.2 'Out of Order' status:** An account is treated as 'Out of Order' if the outstanding balance remains continuously in excess of the sanctioned limit / drawing power. In cases where the outstanding balance in the principal operating account is less than the sanctioned limit / drawing power, but there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not sufficient to cover the interest debited during the same period, these accounts are treated as "out of order".

**1.1.3 Overdue:** Any amount due to the bank under any credit facility is 'overdue' if it is not paid on the due date fixed by the bank.

**1.2 Discussion of the bank's credit risk management policy.**

The credit risk management policy of the bank aims at ensuring sustained growth of healthy

loan portfolio while evolving a well- defined system to identify measure, monitor and control various risks attached to credit portfolio of the Bank. The policy aims at ensuring consistency and standardization of credit practices. There is a defined credit appraisal & credit approval authority, reporting cum monitoring / follow-up system and loan review mechanism/ credit audit system in place at the Bank.

<b>2. <u>Quantitative Disclosures</u></b>		Amount in ₹ million

<ul style="list-style-type: none"> <li>• More than 100% risk weight</li> </ul>	46206.66

**Table- DF -5: Credit risk mitigation:**

<b>1. Qualitative disclosure</b>
<b>1.1 The general qualitative disclosure requirements with respect to credit risk mitigation</b>
A Credit Mitigation and Collateral Management Policy, addressing the Bank's approach towards the credit risk mitigants is used for capital calculation. The Bank reduces its exposure to counterparty with the value of eligible financial collateral to take account of risk mitigating effect of the collateral.

**1.2 Policies and processes for, and an indication of the extent to which the bank makes use of on and off balance sheet netting.**

Bank has put in place Board approved policy on Credit Risk Mitigation and Collateral Management, covering credit risk mitigation techniques used by the Bank for both risk management and capital computation purposes. The Bank has a separate collaterals valuation policy that forms the basis for valuation of collaterals.

**1.3 Policies and processes for collateral valuation and management**

The policy adopts the Comprehensive Approach, which allows full offset of collateral (after appropriate haircuts) against exposures, by effectively reducing the exposure amount by the value ascribed to the collateral. The following issues are addressed in the policy:

- a) Classification of credit risk mitigants
- b) Acceptable credit risk mitigants
- c) Documentation and legal process requirements for credit risk mitigants.
- d) Valuation of collateral
- e) Custody of collateral
- f) Insurance
- g) Monitoring of credit risk mitigants

**1.4 The description of the main type of collaterals taken by the bank**

The main type of collaterals taken by the bank are Cash or cash equivalent, Bank deposits, NSCs, KVIP's, Insurance policies, Central / State government Securities etc.

**1.5 The main type of guarantor counterparties and their creditworthiness.**

Bank considers guarantees, which are direct, explicit, irrevocable and unconditional for credit risk mitigation. Use of such guarantees for capital computation is as per RBI guidelines.

Types of guarantor counter party are:

- a. Sovereigns (Central / State Governments)
- b. Sovereign entities like ECGC, CGTSI
- c. Banks and Primary Dealers with a lower risk weight than the counter party
- d. Other entities that are externally rated. This would include guarantee cover provided by parent, subsidiary and affiliate companies when they have lower risk weight than the obligor.

**1.6 Information about (market or credit) risk concentration within the mitigation taken**

Majority of financial collaterals held by the Bank are by way of bank's own deposits, government securities, life insurance policies and other approved securities like NSCs, KVPs etc. Bank does not envisage market liquidity risk in respect of financial collaterals. Overall, financial collaterals do not have any issue in realization. Concentration on account of collateral is relevant in case of land & building. Except in the case of housing loan to individuals, land and building is considered only as additional security. As land and building is not recognized as eligible collateral under Basel III Standardized Approach, its value is not reduced from the amount of exposure in the process of computation of capital charge, and is used only in the case of housing loan to individuals and non-performing assets to determine the appropriate risk weight. As such, there is no concentration risk on account of nature of collaterals.

<b>2. <u>Quantitative Disclosures</u></b>		Amount in ₹ million
2.1 For disclosure of credit risk portfolio under the standardized approach, the total exposure that is covered by:	<ul style="list-style-type: none"> <li>Exposure covered by Deposits/Cash/ Insurance Policies/NSCs/KVPs</li> </ul> <p style="text-align: center;"><b>₹ 75750.70</b></p>	
2.2 Eligible financial collaterals; after the application of haircuts.	Exposure covered by Other Eligible Collaterals -- <b>Nil</b>	

**Table DF – 6 : Asset Securitisation:**

<ul style="list-style-type: none"> <li>Bank is not currently undertaking any securitization activity.</li> </ul>
--

**Table DF - 7:Market risk in trading book**

<p><b>1. Qualitative Disclosures:</b></p> <p>The market risk for the Trading Book of the Bank is managed in accordance to the Board approved Investment Policy, Trading Policy and Market Risk Policy. These policies provide guidelines to the operations, Valuations, and various risk limits and controls pertaining to various securities, foreign exchange. These policies enhance Bank’s ability to transact in various instruments in accordance with the extant regulatory guidelines and provide sound foundation for day to day Risk Control, Risk management, and prompt business decision making. The Bank also has a Stress Testing Framework which enables Bank to capture impact of various stress scenarios on Trading Book Portfolio. All these policies are reviewed periodically to incorporate changes in economic, business and regulatory environment.</p>
<p><b>1.1 The general qualitative disclosure requirement for market risk including the portfolio covered by securitized approach.</b></p> <p>Risk management and reporting is based on globally accepted parameters such as Modified Duration, PV01, Exposure and Gap Limits, VaR, etc. As per the Market Risk Policy/Trading policy, limits have been set for Forex Open Position limits (Daylight / Overnight), stop-loss limit, Sensitivity limit, VaR limit and exposure limits which are monitored on a daily basis. Bank has a Mid Office in place for functions like onsite monitoring of adherence to set limits, independent</p>

reporting of activities to Top Management and valuation etc.

#### Approach for Computation of Capital Charge for Market Risk

Bank has adopted the Standardised Approach as prescribed by RBI for computation of capital charge for market risk and is already fully compliant with such RBI guidelines. Standardised Approach is applied for calculation of Market Risk for:

- Securities under HFT category
- Securities under AFS category
- Open foreign exchange position
- Equity positions

#### **1.2 General disclosures for market risk including portfolios covered by the IMA. A description of the soundness of the banks methodologies in assessing the capital adequacy, stress testing, and back-testing/validating the accuracy and consistency of the internal models and modeling processes.**

Market risk is calculated on trading portfolio under Standardised duration method as per directives of RBI. Stress testing under various scenarios and calculation of Historical VaR forms an integral part of the portfolio risk management.

<b>1. <u>Quantitative Disclosures</u></b>	Amount in ₹ million
1.1 The capital requirement for market risk as per Standardized Duration Approach:	<b>930.16</b>
• Interest rate risk.	• 590.04
• Equity position risk.	• 309.52
• Foreign exchange risk.	• 30.6
• Commodity risk.	• ----

#### **Table DF – 8--- Operational Risk**

##### **1. Qualitative Disclosures:**

**1.1 General disclosures:** Operational risk is at the core of the Bank's operations to integrate best risk management practices into processes, systems and culture of the bank. The operational risk management (ORM) policy documents the Bank's approach towards management of operational risk and defines the roles and responsibilities of the various stakeholders to manage operational risk within the Bank. The Integrated Risk Management Committee (IRMC) of the Board at the apex level is the policy making body. IRMC is supported by Operational Risk Management Committee (ORMC) at the Executive level, which is

responsible for bank wide implementation of ORM policy. A systematic process for reporting risks, operational losses has been developed. Bank has been collecting internal operational loss data from business units / offices. For this purpose, a system for reporting identified loss events and loss data have been put in place. The Bank has also implemented a comprehensive Business Continuity Plan (BCP) and established Disaster Recovery setup to ensure continuity of critical operations of the Bank in the event of any business disruption. The bank has been regularly conducting DR drills for various systems and applications in use.

The bank has a robust internal control / audit mechanism and reporting system for managing and mitigating operational risk.

**1.2 In addition to general qualitative disclosure requirement, the approach (es) for operational risk capital assessment for which the bank qualifies.**

As per the RBI guidelines, bank is following the Basic indicator approach (BIA) for computing capital charge for operational risk.

**2. Quantitative Disclosures**

**Capital charge for operational risk**

Capital charge for operational risk is computed as per the Basic Indicator Approach prescribed by RBI. Under this approach, capital allocation for operational risk works out to:

**₹ 5841.38(million)**

**Table DF -9 : Interest Rate risk in the banking book (IRRBB)**

<b>1. Qualitative Disclosures:</b>	
<b>1.1 The general qualitative disclosure requirements, including the nature of IRRBB and key assumptions, including assumptions regarding loan prepayments and behavior of non-maturity deposits, and frequency of IRRBB measurement.</b>	
<p>Interest Rate Risk in Banking Book (IRRBB) is the risk which impacts assets and liabilities of Bank's non-trading (core) exposures which are contracted for steady income and statutory obligations and are generally held till maturity. Interest rate risk is measured as the potential volatility in the Bank's core net interest income caused by changes in market interest rates. Difference in pricing parameters of these Assets and Liabilities which may be due to different tenor, asset type, liability type or other parameters exposes the Bank to possible loss. Bank utilizes the following methods to measure, monitor and control the adverse impact of interest rates on the Bank's financial condition within tolerable limits. This impact is calculated from following perspectives.</p> <p>Earnings perspective: Indicates the impact on Bank's Net Interest Income (NII) in the short term.</p> <p>Economic perspective: Indicates the impact on the net-worth of bank due to re-pricing of assets, liabilities and off-balance sheet items.</p> <p>Measurement and computation of interest rate risk in Banking Book under the above two methods is done on a monthly basis.</p>	
<b>2. Quantitative Disclosures</b>	
<b>2.1</b> The increase (decline) in earning and economic value (or relevant measure used by management) for upward and downward rate shocks according to management's method of measuring IRRBB, broken down by currency (where the turnover is more than 5 percent turnover).	<p><u>Changes on account of Interest rate volatility</u></p> <ul style="list-style-type: none"> <li>• Change in net interest income (with 200 bps change in interest rates for both assets and liabilities)                             <ul style="list-style-type: none"> <li>➤ ₹ 393.01 (millions)</li> </ul> </li> <li>• Change in market value of equity (with 200 bps change in interest rates for both assets and liabilities).                             <ul style="list-style-type: none"> <li>➤ 3.80% (₹ 2308.89 millions)</li> </ul> </li> </ul>

**Table DF -10: General Disclosure for Exposures Related to Counterparty Credit Risk**

1. Qualitative Disclosures		
The Bank has a Credit Risk Management Policy and Collateral Management Policy in place which lays down guidelines, processes and measures for counterparty risk management. The counterparty limits are monitored and internal triggers are put in place to guard against breach in limits. Bank takes eligible financial collateral (e.g., cash or securities) on an account-by-account basis to reduce the credit exposure to counterparty while calculating the capital requirements.		
2. Quantitative Disclosures		
The derivative exposure is calculated using Current Exposure Method (CEM) and the balance out standing as on March 31, 2021 is given below.		
Amount in ₹ million		
Particulars	Notional Amount	Current Exposure
Forward forex contracts	11181.87	346.96

**DF11: Composition of Capital**

Basel III common disclosure template to be used from March 31, 2021			Amount in ₹ million
Common Equity Tier 1 capital: instruments and reserves			Ref No
1	Directly issued qualifying common share capital plus related stock surplus (share premium)	11672.71	A1+B2
2	Retained earnings	46246.00	B1+B3+B4+B8
3	Accumulated other comprehensive income (and other reserves)	2991.62	B7
4	<i>Directly issued capital subject to phase out from CET1 (only applicable to non-joint stock companies<sup>1</sup>)</i>		
5	Common share capital issued by subsidiaries and held by third parties (amount allowed in group CET1)		
6	<b>Common Equity Tier 1 capital before regulatory adjustments</b>	<b>60910.33</b>	
Common Equity Tier 1 capital: regulatory adjustments

<b>Exercise of Calls Options in Tax Events and Regulatory Event</b>	<p>Bank may call the instrument due to the occurrence of Tax events or Regulatory event only if permitted by RBI.</p> <p>RBI may permit such type of calls only if it is convinced that the bank was not in a position to anticipate these events at the time of issuance of Perpetual Debt Instruments (PDIs) as per RBI Master circular on Basel-III Capital Regulations July 1, 2013</p>
<b>Repurchase/ Buy-Back / Redemption</b>	<p>The Bank may at any time, subject to the following conditions having been satisfied and such repayment being otherwise permitted by the then prevailing Basel III Guidelines, repay the principal amount of the PDIs by way of repurchasing, buy-back or redemption:</p> <p>(a) with the prior approval of RBI;</p>

	<p>(b) the Bank has not assumed or created any market expectations that RBI approval for such repurchase/redemption/buy-back shall be given; and</p> <p>(c) the Bank: (i) replaces the PDIs with capital of the same or better quality and the replacement of the PDIs is done at conditions which are sustainable for the income capacity of the Bank; or (ii) demonstrates that its capital position is well above the minimum capital requirements after the repurchase / buy-back / redemption; and</p> <p>(d) any other pre-conditions specified in the Basel III Guidelines at such time have been satisfied.</p> <p>Such PDIs may be held, reissued, resold, extinguished or surrendered, at the option of the Bank.</p>
<b>Listing</b>	The PDIs shall be listed on the Wholesale Debt Market (WDM) segment of the BSE. The Designated Stock Exchange for this issue shall be BSE.
<b>Depository</b>	NSDL & CDSL
<b>Deemed Date of Allotment</b>	June 14, 2018
<b>Settlement mode</b>	Payment of interest and repayment of principal shall be made by way of credit through direct credit / NECS /RTGS/NEFT mechanism.
<b>Seniority</b>	<p>The claims of the Bondholders in the PDIs shall be:</p> <p>i. superior to the claims of investors in equity shares and perpetual non-cumulative preference shares, if any, of the Bank whether currently outstanding or issued at any time in the future.</p> <p>ii. subordinated to the claims of depositors, general creditors and subordinated debt of the Bank other than any subordinated debt qualifying as Additional Tier 1 Capital (as defined in the Basel III Guidelines) of the Bank;</p> <p>iii. neither secured nor covered by a guarantee of the Bank or its related entity or other arrangement that legally or economically enhances the seniority of the claim vis -à-vis creditors of the Bank;</p>
<b>Loss Absorbency</b>	<p>The PDIs are subject to principal loss absorption as described herein and which are required of ‘Additional Tier I instruments’ at Level of Pre-Specified Trigger and at Point of Non Viability as provided for in <i>Annex 16</i> of the Basel III Guidelines.</p> <p>The write-down will have the following effects:</p> <ul style="list-style-type: none"> <li>• Reduce the claim of the PDIs(up to nil) in liquidation;</li> </ul>

	<ul style="list-style-type: none"> <li>• Reduce the amount re-paid (up to nil) when a call is exercised; and</li> <li>• Partially or fully reduce Coupon payments on the PDIs.</li> </ul> <p><b><i>Loss Absorption at Pre-Specified Trigger Level</i></b>                  If a Pre-Specified Trigger Level(as described below) occurs, the Bank shall: (a) notify the Trustee; (b) cancel any coupon which is accrued and unpaid to as on the write- down date; and (c) without the need for the consent of Bondholders or the Trustee, write down the outstanding principal of the PDIs by such amount as the Issuer may in its absolute discretion decide subject to the amount of write down not exceeding the amount which would be required to bring the Common Equity Tier 1 (CET 1) ratio to 8% of RWAs (minimum CET 1 of 5.5% + capital conservation buffer of 2.5%) and in no case such amount shall be less than the amount required to immediately return the Issuer’s CET 1 ratio to above the Pre-Specified Trigger Levelor, if this is not possible, the full principal value of the PDIs (the “<b>CET1 Write Down Amount</b>”)</p>
<b>Point of Non-Viability (PONV) Trigger</b>	<p>The PDIs, at the option of the RBI, can be permanently written off upon occurrence of the trigger event, called the Point of Non-Viability Trigger (“<b>PONV Trigger</b>”). If a PONV Trigger (asdescribedbelow)occurs, the Issuer shall: (a) notify the Trustee; (b) cancel any Coupon which is accrued and unpaid on the PDIs as on the write-down date; and (c) without the need for the consent of Bondholders or the Trustee, write down the outstanding principal of the PDIs by such amount as may be prescribed by RBI and subject as is otherwise required by the RBI at the relevant time.</p> <p>Following writing-off of the PDIs and claims and demands as noted above neither the Bank, nor any other person on the Bank’s behalf shall be required to compensate or provide any relief, whether absolutely or contingently, to the Bondholder or any other person claiming for or on behalf of or through such holder and all claims and demands of such persons, whether under law, contract or equity, shall stand permanently and irrevocably extinguished and terminated.</p> <p>The write-off of any CET 1 capital shall not be required before the write-off of any of the PDIs and there is no right available to the Bondholder hereof or any other person claiming for or on behalf of or through such holder to</p>

demand or seek that any other regulatory capital be subject to prior or simultaneous write-off or that the treatment offered to holders of such other regulatory capital be also offered to the Bondholders.

‘PONV Trigger Event’ is the earlier of:

- (a) a decision that a permanent write-off without which the Bank would become non-viable, is necessary as determined by the RBI; and
- (b) the decision to make a public sector injection of capital, or equivalent support, without which the Bank would have become non-viable, as determined by the relevant authority.

The PONV Trigger Event will be evaluated both at consolidated and solo level and breach at either level will trigger write-off.

The amount of non-equity capital to be written-off will be determined by RBI.

The order of write-off of the PDIs shall be as specified in the order of Seniority as per this Information Memorandum and any other regulatory norms as may be stipulated by the RBI from time to time.

The PDIs can be written-down multiple times in case the Bank hits the PONV Trigger Level subsequent to the first write-down. The PDIs which have been written down shall not be written up.

The write-off consequent upon the PONV Trigger Event shall occur prior to any public-sector injection of capital so that the capital provided by the public sector is not diluted. The Bondholders shall not have any residual claims on the Bank (including any claims which are senior to ordinary shares of the Bank), following the PONV Trigger Event and when write-off is undertaken.

For these purposes, the Bank may be considered as non-viable if:

The Bank which, owing to its financial and other difficulties, may no longer remain a going concern on its own in the

	<p>opinion of the RBI unless appropriate measures are taken to revive its operations and thus, enable it to continue as a going concern. The difficulties faced by the Bank should be such that these are likely to result in financial losses and raising the CET 1 capital of the Bank should be considered as the most appropriate way to prevent the Bank from turning non-viable. Such measures would include write-off of non-equity regulatory capital into common shares in combination with or without other measures as considered appropriate by the RBI.</p> <p>The Bank facing financial difficulties and approaching a PONV will be deemed to achieve viability if within a reasonable time in the opinion of RBI, it will be able to come out of the present difficulties if appropriate measures are taken to revive it. The measures including augmentation of equity capital through write off of PDIs / public sector injection of funds are likely to:</p> <ul style="list-style-type: none"> <li>(a) Restore depositors'/investors' confidence;</li> <li>(b) Improve rating /creditworthiness of the Bank and thereby improve its borrowing capacity and liquidity and reduce cost of funds; and</li> <li>(c) Augment the resource base to fund balance sheet growth in the case of fresh injection of funds.</li> </ul> <p>RBI would follow a two- stage approach to determine the non-viability of the Bank. The Stage 1 assessment would consist of purely objective and quantifiable criteria to indicate that there is a prima facie case of the Bank approaching non-viability and, therefore, a closer examination of the Issuer's financial situation is warranted. The Stage 2 assessment would consist of supplementary subjective criteria which, in conjunction with the Stage 1 information, would help in determining whether the Bank is about to become non-viable. These criteria would be evaluated together and not in isolation. Once the PONV is confirmed, the next step would be to decide whether rescue of the Bank would be through write-off alone or write-off in conjunction with a public-sector injection of funds.</p>
<b>Cross Default</b>	Not Applicable
<b>Treatment of Basel-III compliant PDI instrument of Re-Constitution / Amalgamation/ Acquisition / Winding-Up / Liquidation of the bank</b>	As per terms and conditions specified in Annex 16 of RBI master circular on Basel-III Capital Regulations, (Paras 2.9 to 2.15 and para 3.9), dated July 1, 2013

Basel III complaint Tier II bonds of ₹ 5000 million		
1	Issuer	THE JAMMU & KASHMIR BANK LTD
2	Unique identifier (e.g. CUSIP, ISIN or Bloomberg identifier for private placement)	INE168A08038
3	Governing law(s) of the instrument	Companies Act, 2013; SEBI (Issue and Listing of Debt Securities) Regulations, 2008; and RBI's Master Circular on Basel III Capital Regulations
	Regulatory treatment	
4	Transitional Basel III rules	Tier 2
5	Post-transitional Basel III rules	Tier 2
6	Eligible at solo/group/ group & solo	SOLO
7	Instrument type	Tier 2 Debt Instruments
8	Amount recognised in regulatory capital ( in million, as of most recent reporting date)	Rs.5000 Million
9	Par value of instrument	Rs.1000000/- per NCD
10	Accounting classification	Liability
11	Original date of issuance	24.03.2017
12	Perpetual or dated	Dated
13	Original maturity date	24.06.2022
14	Issuer call subject to prior supervisory approval	No
15	Optional call date, contingent call dates and redemption amount	NA
16	Subsequent call dates, if applicable	NA
	Coupons / dividends	
17	Fixed or floating dividend/coupon	Fixed
18	Coupon rate and any related index	9.50% p.a.
19	Existence of a dividend stopper	Yes
20	Fully discretionary, partially discretionary or mandatory	Mandatory
21	Existence of step up or other incentive to redeem	No
22	Non-cumulative or cumulative	Non-cumulative
23	Convertible or non-convertible	Non-Convertible
24	If convertible, conversion trigger(s)	NA

25	If convertible, fully or partially	NA
26	If convertible, conversion rate	NA
27	If convertible, mandatory or optional conversion	NA
28	If convertible, specify instrument type convertible into	NA
29	If convertible, specify issuer of instrument it converts into	NA
30	Write-down feature	Yes
31	If write-down, write-down trigger(s)	PONV Trigger Event as defined in Transaction Documents
32	If write-down, full or partial	Fully or partially
33	If write-down, permanent or temporary	Permanent
34	If temporary write-down, description of write-up mechanism	NA
35	Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument)	Tier 2 instruments shall be superior to the claims of investors in instruments eligible for inclusion in Tier 1 Capital and subordinate to the claims of all depositors and general creditors of the Bank
36	Non-compliant transitioned features	Yes
37	If yes, specify non-compliant features	The Bonds shall be subject to loss absorbency features applicable for non-equity capital instruments as per the Master Circular issued by the Reserve Bank of India on Basel III capital regulations covering terms and conditions for issue of debt capital instruments for inclusion as Tier II Capital (Annex 5 of the Master Circular) and minimum requirement to ensure loss absorbency of non-equity regulatory capital instruments at the Point of Non Viability (PONV) (Annex 16 of the Master Circular) read along with the Master Circular. Accordingly, the Bonds may, at the option of the RBI, be permanently written off upon occurrence of the trigger event called the “Point of Non Viability Trigger”. PONV trigger event shall be as defined in the RBI Regulations and shall be determined by the RBI.

PONV trigger event shall be as defined in the RBI Regulations and shall be determined by the RBI.

## LEVERAGE RATIO

Leverage ratio is a non-risk based measure of exposure over capital. The leverage ratio is calibrated to act as a credible supplementary measure to the risk based capital requirements. The Basel III leverage ratio is defined as the ratio of capital measure (the numerator) to exposure measure (the denominator), expressed as a percentage.

The capital measure used for the leverage ratio at any particular point in time is the Tier 1 capital measure applying at that time under the risk-based framework. Total exposure measure is the sum of the on-balance sheet exposures, derivative exposures, securities financing transaction (SFT) exposures and off- balance sheet (OBS) items.

$$\text{Leverage ratio} = \frac{\text{Capital Measure (Tier 1 Capital)}}{\text{Exposure Measure}}$$

As on 31.03.2021

Amount in ₹ million
