

## Basel-III --- Pillar-3 disclosures as on 31<sup>st</sup> March- 2018

**Table DF-1: Scope of application :**

The Basel III capital adequacy norms are applicable to Jammu & Kashmir bank Ltd.

<b>Name of the head of the banking group to which the Framework applies.</b>	<b>Jammu and Kashmir Bank Ltd</b>
--	-----------------------------------

Jammu and Kashmir Bank (J&K Bank) is a commercial Bank incorporated on October 1, 1938 and the only state-government-owned scheduled commercial bank in India.

**(i) Qualitative Disclosures:**

**a. The List of group entities considered for consolidation**

<b>Name of the entity / Country of Incorporation</b>	<b>Included under accounting scope of consolidation (yes / no)</b>	<b>Method of consolidation</b>	<b>Included under regulatory scope of consolidation (yes / no)</b>	<b>Method of consolidation</b>	<b>Reason for difference in the method of consolidation</b>	<b>Reasons, if consolidated under only one of the scopes of consolidation</b>
----Nil---	----Nil---	----Nil---	----Nil---	----Nil---	----Nil---	----Nil---

**b. The List of group entities not considered for consolidation both under the accounting and regulatory scope of consolidation is given below.**

<b>Name of the entity / Country of incorporation</b>	<b>Principle activity of the entity</b>	<b>Total balance sheet equity</b>	<b>Percentage of bank's holding in the total equity</b>	<b>Regulatory treatment of bank's investments in the capital instruments of the entity</b>	<b>Total balance sheet assets</b>
J&K Bank Financial Services Ltd	Marketing of Financial Products	` 200 million	100%	The entire amount of `200million has been deducted	` 188.01 million

				from capital	
--	--	--	--	--------------	--

**(ii) Quantitative Disclosures**

**c. The List of group entities considered for consolidation as on 31<sup>st</sup> March 2018:**

Name of the entity / country of incorporation	Principal activity of the entity	Total Balance Sheet Equity	Total Balance Sheet Assets
----Nil---	----Nil---	----Nil---	----Nil---

**d. The aggregate amount of capital deficiencies in all subsidiaries, which are not included in the regulatory scope of consolidation i.e. that are deducted:**

Name of the subsidiaries / country of incorporation	Principal activity of the entity	Total balance sheet equity	Percentage of Bank's Holding in the Total Equity	Capital Deficiencies
----Nil---	----Nil---	----Nil---	----Nil---	----Nil---

**e. The aggregate amounts ( e.g current book value) of the bank's total interests in insurance entities, which are risk weighted:**

Name of the insurance entities Country of incorporation	Principal activity of the entity	Total balance sheet equity	Percentage of bank's holding in the total equity / proportion of voting power	Quantitative impact on regulatory capital of using risk weighting method versus using the full deduction method
PNB Metlife India Insurance Company Ltd / India	Insurance Business	1021.89 Mios	5.08%	CRAR will reduce by 0.14% under the deduction method

**f. Any restrictions or impediments on transfer of funds or regulatory capital within the banking group**

Not Applicable

**Table DF - 2 : Capital adequacy;**

<b>1. Qualitative disclosure</b>	
<b>1.1 A summary discussion of the bank's approach to assessing the adequacy of its capital to support current and future activities.</b>	
<p>i) The Bank is subject to Capital Adequacy guidelines of RBI, which are based on the framework of Basel Committee on Banking Supervision. As per Basel III guidelines the minimum capital required to be maintained by the Bank is 10.875 percent with minimum Common Equity Tier 1 (CET1) of 7.375% as on March 2018. Stress analysis is conducted on half yearly basis or as required to see the impact on capital adequacy ratio (CAR) in near to medium horizon.</p> <p>ii) The Bank assesses its capital requirement based on business projections and opportunities for growth that are in line with the strategic intent of the Bank. The business projections are mapped to credit, market and operational risks which allows for assignment of regulatory capital besides providing capital headroom to meet growth projections. As part of the Internal Capital Adequacy Assessment Process (ICAAP), Bank also assesses adequacy of capital under stress conditions for gauging the adequacy of capital to support not only three primary risks of credit, market and operational risk but other residual risks like interest rate risk in banking book, liquidity risk, credit concentration risk, strategic risk and reputational risk.</p>	
<b>2. Quantitative Disclosures</b> Amount in ₹ million	
<b>2.1 Capital requirements for credit risk</b>	<b>59722.63</b>
• Portfolio subjected to standardized approach	<b>59722.63</b>
• Portfolios subjected to the IRB approaches	<b>Nil</b>
• Securitization exposures	<b>Nil</b>
<b>2.2 Capital requirement for market risk (under Standardized duration approach)</b>	<b>1613.4</b>
• Interest rate risk	<b>857.9</b>
• Foreign exchange risk (including gold)	<b>30.6</b>
• Equity risk	<b>724.8</b>
<b>2.3 Capital requirement for operational risk</b>	<b>4669.4</b>

• Basic indicator approach:		• <b>4669.4</b>	
<b>2.4 Common Equity Tier 1, Tier 1 and Total Capital ratios:</b>

<b>J&amp;K Bank Ltd</b>	<b>9.24%</b>	<b>9.24%</b>	<b>11.42%</b>

## **Risk Exposure and Assessment**

### **Structure and Organisation of Risk Management Function**

The Bank's risk governance architecture focuses on key risk areas of credit, market (including liquidity) and operational risk. The quantification of these risks, wherever possible, ensures effective and continuous monitoring and control. The risk management system is overseen by Board of Directors of the bank, with Integrated Risk Management Committee (IRMC), a board level sub-committee entrusted with the overall responsibility of ensuring that adequate structures, policies and procedures are in place for risk management in the Bank. The IRMC of Board is supported by separate Executive level Committees viz, Credit Risk Management Committee (CRMC), Asset-Liability Management Committee (ALCO), Market Risk Management Committee and Operational Risk Management Committee (ORMC) to ensure effective management of credit, market and operational risks respectively. The executive level committees are in turn assisted / supported by respective risk management support groups for credit, operational, market and liquidity risks. These support groups provide support functions to the above committees through analysis of risks and reporting of risk positions and making recommendations as to the level and degree of risks to be undertaken.

Credit Monitoring Division (CMD) has been set up for ongoing monitoring of credit quality of borrowers. Department besides online monitoring of special mention accounts and limit monitoring releases caution list of borrows at regular intervals based on the Early Warning Signal framework of the RBI.

In terms of enhanced operational risk management framework Bank has formed Zonal Risk Management Committees (ZRMC) which meets necessarily at least once in a quarter to discuss all the issues related to operational/Credit risk management and implementation of enhanced risk management framework at the gross root level. Zonal Head, designated Zonal Risk managers and identified business unit heads and members from IRMD CHQ participate in the meeting.

### **Table DF – 3: Credit Risk**

#### **General disclosures --- Credit Risk**

**Credit Risk** is the possibility of loss that a bank may be subjected to, on account of changes or deterioration in the credit profile / credit quality of borrowers and counterparties. The Bank is exposed to credit risk through lending and capital market activities. Bank has put in place Board approved comprehensive Credit Risk Management Policy which aims at ensuring sustained growth of healthy loan portfolio while identifying and managing credit risks, both at transaction and portfolio levels. It lays down the roles and responsibilities, risk appetite, key processes and reporting framework.

The Bank manages its credit risk through following strategies:

- a) Well defined credit risk management structure to identify measure, monitor and control / mitigate credit risk from loan origination to disbursement and post disbursement monitoring has been laid out.
- b) Board approved Investment Policy of the Bank addresses credit risks related to investment activities undertaken by the Bank, prescribing prudential limits, methods of risk measurement and hedges required in mitigation of risks arising in investment portfolio.
- c) Corporate credit is managed through rating of borrowers and thorough risk vetting of individual exposures at origination and periodic review after sanctioning. Retail credit to individuals and small business is managed through definition of product criteria, appropriate credit filters and subsequent portfolio monitoring.
- d) Industry wise segment ceilings on aggregate lending by the Bank.
- e) Individual borrower wise ceilings on lending as well as borrower group wise lending ceilings linked to the Bank's capital funds.
- f) Bank has comprehensive risk rating system that serves as a single point indicator of diverse risk factors of counterparty and for taking credit decisions in a consistent manner. The credit rating models use a combination of quantitative and qualitative factors that include borrower specific characteristics, industry score etc. to arrive at a 'point in time' view of risk.
- g) Allowing credit exposures as per the credit rating of borrowers upto defined thresholds of risk levels. The approach also includes diversification of credit portfolio rating category wise but within the acceptable risk parameters.
- h) The Bank's entire current business is within India and hence there is no geographic ceiling on lending in India or outside India. Further, there is also no ceiling on lending within a State in India.

- i) A mechanism of clear and well defined delegation of authority operates within the Bank in regard to decision making, which links risk and exposure amount to level of approval.
- j) Regular review of all credit sanctioning powers delegated to various sanctioning levels so as to continuously strengthen the credit processes, and monitoring oversight are undertaken.
- k) Approval processes with respect to credit proposals are preceded by study of risks and preliminary due diligence particularly while sourcing fresh credit accounts.
- l) Credit audit system and loan review mechanism function independently of the credit processing / credit approval system and ensure effective loan monitoring, management / mitigation of credit and operational risks in the loan portfolio.
- m) An appropriate mechanism for ongoing identification, development and assessment of expertise of officials in the area of credit appraisal and credit management function.

## **1. Qualitative Disclosures: The general qualitative disclosure requirement with respect to credit risk including:**

### **1.1.1 Definition of NPA and impaired account**

An asset including a leased asset becomes non-performing when it ceases to generate income for the bank. A non-performing asset (NPA) is a loan or an advance where:

- a. Interest and/or installment of principal remain overdue for a period of more than 90 days in respect of a term loan
- b. The account remains 'out of order' as indicated in paragraph 1.1.2 below, in respect of an Overdraft / Cash Credit (OD/CC)
- c. The bill remains overdue for a period of more than 90 days in case of bills purchased and discounted
- d. The installment of principal or interest thereon remains overdue for two crop seasons for short duration crops
- e. The installment of principal or interest thereon remains overdue for one crop season for long duration crops.
- f. In respect of securities, where interest/principal is in arrears for a period of more than 90 days.

An account is also classified as NPA if the interest due and charged during any quarter is not serviced fully within 90 days from the end of the quarter.

**1.1.2 'Out of Order' status:** An account is treated as 'Out of Order' if the outstanding balance remains continuously in excess of the sanctioned limit / drawing power. In cases where the

outstanding balance in the principal operating account is less than the sanctioned limit / drawing power, but there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not sufficient to cover the interest debited during the same period, these accounts are treated as “out of order”.

**1.1.3 Overdue:** Any amount due to the bank under any credit facility is ‘overdue’ if it is not paid on the due date fixed by the bank.

## 1.2 Discussion of the bank’s credit risk management policy.

The credit risk management policy of the bank aims at ensuring sustained growth of healthy loan portfolio while evolving a well- defined system to identify measure, monitor and control various risks attached to credit portfolio of the Bank. The policy aims at ensuring consistency and standardization of credit practices. There is a defined credit appraisal & credit approval authority, reporting cum monitoring / follow-up system and loan review mechanism/ credit audit system in place at the Bank.

<b>2. <u>Quantitative Disclosures</u> Amount in ` million</b>

<b>1.1 For portfolio under the standardized approach:</b>	
<ul style="list-style-type: none"> <li><b>Names of credit rating agencies used, plus reasons</b></li> </ul>	<ul style="list-style-type: none"> <li>The Bank's exposure being mainly domestic, rating agencies like CARE, CRISIL, ICRA, India Ratings, Brickwork Ratings ,SMERA and Infomerics have been</li> </ul>

<p><b>for any changes.</b></p>	<p>identified for rating of exposure as per RBI guidelines. Designated rating agencies are used irrespective of types of corporate exposures.</p>
<ul style="list-style-type: none"> <li>• <b>Type of exposure for which each agency is used.</b></li> </ul>	<ul style="list-style-type: none"> <li>• For exposures with a contractual maturity of less than or equal to one year (except cash credit, overdraft and other revolving credits), short-term ratings given by approved rating agencies are used. For cash credit, sanctioned overdrafts and other revolving credits (irrespective of the period) and for term loan exposures of over one year, long term ratings are used.</li> </ul>
<ul style="list-style-type: none"> <li>• <b>A description of the process used to transfer public issues rating onto comparable assets in the banking book</b></li> </ul>	<ul style="list-style-type: none"> <li>• Public issue ratings are used for comparable assets of borrower in the banking book as follows: -             <ul style="list-style-type: none"> <li>i) In cases where the borrower has a specific assessment for an issued debt - but the bank's claim is not an investment in this particular debt - the rating applicable to the specific debt (where the rating maps into a risk weight lower than that which applies to an unrated claim) is applied to the bank's unassessed claim if the Bank's exposure ranks <i>pari passu</i> or senior to the specific rated debt in all respects and the maturity of the unrated Bank's claim is not later than the maturity of the rated claim.</li> <li>i) If either the issuer or single issue has been assigned a low quality assessment which maps into a risk weight equal to or higher than that which applies to unrated claims, an unassessed claim on the same counterparty that ranks <i>pari-passu</i> or is subordinated to the rated exposure is assigned the same risk weight as is applicable to the low quality assessment.</li> </ul> </li> </ul>

**2. Quantitative Disclosures** Amount in ` million

<p><b>2.1 Exposure amount after risk mitigation subjected to the standardized approach, amount of bank's outstanding (rated and un-rated) in the following three major risk buckets as well as those that are deducted:</b></p>	
<ul style="list-style-type: none"> <li>• Below 100% risk weight</li> </ul>	<p>611087.7</p>
<ul style="list-style-type: none"> <li>• 100% risk weight</li> </ul>	<p>182675.7</p>
<ul style="list-style-type: none"> <li>• More than 100% risk weight</li> </ul>	<p>161245.6</p>

**Table- DF -5: Credit risk mitigation:**

<p><b>1. Qualitative disclosure</b></p>
<p><b>1.1 The general qualitative disclosure requirements with respect to credit risk mitigation</b></p>
<p>A Credit Mitigation and Collateral Management Policy, addressing the Bank's approach towards the credit risk mitigants is used for capital calculation. The Bank reduces its exposure to counterparty with the value of eligible financial collateral to take account of risk mitigating effect of the collateral.</p>
<p><b>1.2 Policies and processes for, and an indication of the extent to which the bank makes use of on and off balance sheet netting.</b></p>
<p>Bank has put in place Board approved policy on Credit Risk Mitigation and Collateral Management, covering credit risk mitigation techniques used by the Bank for both risk management and capital computation purposes. The Bank has a separate collaterals valuation policy that forms the basis for valuation of collaterals.</p>
<p><b>1.3 Policies and processes for collateral valuation and management</b></p>
<p>The policy adopts the Comprehensive Approach, which allows full offset of collateral (after appropriate haircuts) against exposures, by effectively reducing the exposure amount by the value ascribed to the collateral. The following issues are addressed in the policy:</p> <ul style="list-style-type: none"> <li>a) Classification of credit risk mitigants</li> <li>b) Acceptable credit risk mitigants</li> <li>c) Documentation and legal process requirements for credit risk mitigants.</li> <li>d) Valuation of collateral</li> <li>e) Custody of collateral</li> <li>f) Insurance</li> <li>g) Monitoring of credit risk mitigants</li> </ul>
<p><b>1.4 The description of the main type of collaterals taken by the bank</b></p>
<p>The main type of collaterals taken by the bank are Cash or cash equivalent, Bank deposits, NSCs, KVIP's, LIC policy, Central / State government Securities etc.</p>
<p><b>1.5 The main type of guarantor counterparties and their creditworthiness.</b>  Bank considers guarantees, which are direct, explicit, irrevocable and unconditional for credit risk mitigation. Use of such guarantees for capital computation is as per RBI guidelines.  Types of guarantor counter party are:</p> <ul style="list-style-type: none"> <li>a. Sovereigns (Central / State Governments)</li> <li>b. Sovereign entities like ECGC, CGTSI</li> <li>c. Banks and Primary Dealers with a lower risk weight than the counter party</li> <li>d. Other entities that are externally rated. This would include guarantee cover provided by</li> </ul>

parent, subsidiary and affiliate companies when they have lower risk weight than the obligor.

**1.6 Information about (market or credit) risk concentration within the mitigation taken**

Majority of financial collaterals held by the Bank are by way of bank's own deposits, government securities, life insurance policies and other approved securities like NSCs, KVPs etc. Bank does not envisage market liquidity risk in respect of financial collaterals. Overall, financial collaterals do not have any issue in realization. Concentration on account of collateral is relevant in case of land & building. Except in the case of housing loan to individuals, land and building is considered only as additional security. As land and building is not recognized as eligible collateral under Basel III Standardized Approach, its value is not reduced from the amount of exposure in the process of computation of capital charge, and is used only in the case of housing loan to individuals and non-performing assets to determine the appropriate risk weight. As such, there is no concentration risk on account of nature of collaterals.

**2. Quantitative Disclosures**

		Amount in` million
2.1 For disclosure of credit risk portfolio under the standardized approach, the total exposure that is covered by:	<ul style="list-style-type: none"> <li>Exposure covered by Deposits/Cash/LIC Policies/NSCs/KVPs</li> </ul>	<b>59111.6</b>
2.2 Eligible financial collaterals; after the application of haircuts.	Exposure covered by Other Eligible Collaterals -- Nil	

**Table DF – 6 : Asset Securitisation:**

- Bank is not currently undertaking any securitization activity.

**Table DF - 7:Market risk in trading book**

**1. Qualitative Disclosures:**

The market risk for the Trading Book of the Bank is managed in accordance to the Board approved Investment Policy, Trading Policy and Market Risk Policy. These policies provide guidelines to the operations, Valuations, and various risk limits and controls pertaining to

various securities, foreign exchange. These policies enhance Bank's ability to transact in various instruments in accordance with the extant regulatory guidelines and provide sound foundation for day to day Risk Control, Risk management, and prompt business decision making. The Bank also has a Stress Testing Framework which enables Bank to capture impact of various stress scenarios on Trading Book Portfolio. All these policies are reviewed periodically to incorporate changes in economic, business and regulatory environment.

**1.1 The general qualitative disclosure requirement for market risk including the portfolio covered by securitized approach.**

Risk management and reporting is based on globally accepted parameters such as Modified Duration, PVO1, Exposure and Gap Limits, VaR, etc. As per the Market Risk Policy/Trading policy, limits have been set for Forex Open Position limits (Daylight / Overnight), stop-loss limit, Sensitivity limit, VaR limit and exposure limits which are monitored on a daily basis. Bank has a Mid Office in place for functions like onsite monitoring of adherence to set limits, independent reporting of activities to Top Management and valuation etc.

Approach for Computation of Capital Charge for Market Risk

Bank has adopted the Standardised Approach as prescribed by RBI for computation of capital charge for market risk and is already fully compliant with such RBI guidelines. Standardised Approach is applied for calculation of Market Risk for:

- Securities under HFT category
- Securities under AFS category
- Open foreign exchange position
- Equity positions

**1.2 General disclosures for market risk including portfolios covered by the IMA. A description of the soundness of the banks methodologies in assessing the capital adequacy, stress testing, and back-testing/validating the accuracy and consistency of the internal models and modeling processes.**

Market risk is calculated on trading portfolio under Standardised duration method as per directives of RBI. Stress testing under various scenarios and calculation of Historical VaR forms an integral part of the portfolio risk management.

1. <u>Quantitative Disclosures</u>	Amount in `million
1.1 The capital requirement for market risk as per Standardized Duration Approach:	<b>1613.4</b>

• Interest rate risk.	• 857.9
• Equity position risk.	• 724.8
• Foreign exchange risk.	• 30.6
• Commodity risk.	• ----

**Table DF – 8--- Operational Risk**

**1. Qualitative Disclosures:**

**1.1 General disclosures:** Operational risk is at the core of the Bank’s operations to integrate best risk management practices into processes, systems and culture of the bank. The operational risk management (ORM) policy documents the Bank’s approach towards management of operational risk and defines the roles and responsibilities of the various stakeholders to manage operational risk within the Bank. The Integrated Risk Management Committee (IRMC) of the Board at the apex level is the policy making body. IRMC is supported by Operational Risk Management Committee (ORMC) at the Executive level, which is responsible for bank wide implementation of ORM policy. A systematic process for reporting risks, operational losses has been developed. Bank has been collecting internal operational loss data from business units / offices. For this purpose, a system for reporting identified loss events and loss data have been put in place. The Bank has also implemented a comprehensive Business Continuity Plan (BCP) and established Disaster Recovery setup to ensure continuity of critical operations of the Bank in the event of any business disruption. The bank has been regularly conducting DR drills for various systems and applications in use.

The bank has a robust internal control / audit mechanism and reporting system for managing and mitigating operational risk.

**1.2 In addition to general qualitative disclosure requirement, the approach (es) for operational risk capital assessment for which the bank qualifies.**

As per the RBI guidelines, bank is following the Basic indicator approach (BIA) for computing capital charge for operational risk. The bank has initiated steps for migration to The Standardized Approach (TSA) and Advanced Measurement Approach (AMA) for calculating capital for operational risk.

**2. Quantitative Disclosures**

<b>Capital charge for operational risk</b>	Capital charge for operational risk is computed as per the Basic Indicator Approach prescribed by RBI. Under this approach, capital allocation for operational risk works out to:  ` <b>4669.4(million)</b>
--	---

**Table DF -9 : Interest rate risk in the banking book (IRRBB)**

<b>1. Qualitative Disclosures:</b>
<p><b>1.1 The general qualitative disclosure requirements, including the nature of IRRBB and key assumptions, including assumptions regarding loan prepayments and behavior of non-maturity deposits, and frequency of IRRBB measurement.</b></p> <p>Interest Rate Risk in Banking Book (IRRBB) is the risk which impacts assets and liabilities of Bank's non-trading (core) exposures which are contracted for steady income and statutory obligations and are generally held till maturity. Interest rate risk is measured as the potential volatility in the Bank's core net interest income caused by changes in market interest rates. Difference in pricing parameters of these Assets and Liabilities which may be due to different tenor, asset type, liability type or other parameters exposes the Bank to possible loss. Bank utilizes the following methods to measure, monitor and control the adverse impact of interest rates on the Bank's financial condition within tolerable limits. This impact is calculated from following perspectives.</p> <p>Earnings perspective: Indicates the impact on Bank's Net Interest Income (NII) in the short term.</p> <p>Economic perspective: Indicates the impact on the net-worth of bank due to re-pricing of assets, liabilities and off-balance sheet items.</p> <p>Measurement and computation of interest rate risk in Banking Book under the above two methods is done on a monthly basis.</p>

<b>2. Quantitative Disclosures</b>	
<p><b>2.1</b> The increase (decline) in earning and economic value (or relevant measure used by management) for upward and downward rate shocks according to management's method of measuring IRRBB, broken down by currency (where the turnover is more than 5 percent turnover).</p>	<p><u>Changes on account of Interest rate volatility</u></p> <ul style="list-style-type: none"> <li>• Change in net interest income (with 200 bps change in interest rates for both assets and liabilities) ` 97.80million</li> <li>• Change in market value of equity (with 200 bps change in interest rates for both assets and liabilities). ➤ 4.18% (` 2425.00 million)</li> </ul>

**Table DF -10: General Disclosure for Exposures Related to Counterparty Credit Risk**

## 1. Qualitative Disclosures

The Bank has a Credit Risk Management Policy and Collateral Management Policy in place which lays down guidelines, processes and measures for counterparty risk management. The counterparty limits are monitored and internal triggers are put in place to guard against breach in limits. Bank takes eligible financial collateral (e.g., cash or securities) on an account-by-account basis to reduce the credit exposure to counterparty while calculating the capital requirements.

## 2. Quantitative Disclosures

The derivative exposure is calculated using Current Exposure Method (CEM) and the balance out standing as on March 31, 2018 is given below.

Amount in ` million

Particulars	Notional Amount	Current Exposure
Forward forex contracts	22701.00	195.22

### **DF11: Composition of Capital**

<b>Basel III common disclosure template to be used from March 31,2018</b>			
<b>CommonEquityTier1capital:instrumentsandreserves</b>			Ref No
1	Directly issued qualifying common share capital plus related stock surplus(share premium)	6672.7	
2	Retained earnings	51528.4	
3	Accumulated other comprehensive income (and other reserves)		
4	<i>Directly issued capital subject to phase out from CET1 (only applicable to non-joint stock companies<sup>1</sup>)</i>

6	<b>Eligible at solo/group/ group &amp; solo</b>	SOLO
7	<b>Instrument type</b>	Tier 2 Debt Instruments
8	<b>Amount recognised in regulatory capital ( ₹ in million, as of most recent reporting date)</b>	Rs.5000 Million
9	<b>Par value of instrument</b>	Rs.1000000/- per NCD
10	<b>Accounting classification</b>	Liability
11	<b>Original date of issuance</b>	28.12.2017
12	<b>Perpetual or dated</b>	Dated
13	<b>Original maturity date</b>	27.12.2024

14	Issuer call subject to prior supervisory approval	No
15	Optional call date, contingent call dates and redemption amount	NA
16	Subsequent call dates, if applicable	NA
	Coupons / dividends	
17	Fixed or floating dividend/coupon	Fixed
18	Coupon rate and any related index	9.25% p.a.
19	Existence of a dividend stopper	Yes
20	Fully discretionary, partially discretionary or mandatory	Mandatory
21	Existence of step up or other incentive to redeem	No
22	Non-cumulative or cumulative	Non-cumulative
23	Convertible or non-convertible	Non-Convertible
24	If convertible, conversion trigger(s)	NA
25	If convertible, fully or partially	NA
26	If convertible, conversion rate	NA
27	If convertible, mandatory or optional conversion	NA
28	If convertible, specify instrument type convertible into	NA
29	If convertible, specify issuer of instrument it converts into	NA
30	Write-down feature	Yes
31	If write-down, write-down trigger(s)	PONV Trigger Event as defined in Transaction Documents
32	If write-down, full or partial	Fully or Partially
33	If write-down, permanent or temporary	Permanent
34	If temporary write-down, description of write-up mechanism	NA
35	Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument)	Tier 2 instruments shall be superior to the claims of investors in instruments eligible for inclusion in Tier 1 Capital and subordinate to the claims of all depositors and general creditors of the Bank
36	Non-compliant transitioned features	Yes
37	If yes, specify non-compliant features	The Bonds shall be subject to loss absorbency features applicable for

non-equity capital instruments as per the Master Circular issued by the Reserve Bank of India on Basel III capital regulations covering terms and conditions for issue of debt capital instruments for inclusion as Tier II Capital (Annex 5 of the Master Circular) and minimum requirement to ensure loss absorbency of non-equity regulatory capital instruments at the Point of Non Viability (PONV) (Annex 16 of the Master Circular) read along with the Master Circular. Accordingly, the Bonds may, at the option of the RBI, be permanently written off upon occurrence of the trigger event called the “Point of Non Viability Trigger”. PONV trigger event shall be as defined in the RBI Regulations and shall be determined by the RBI.

## **LEVERAGE RATIO**

Leverage ratio is a non-risk based measure of exposure over capital. The leverage ratio is calibrated to act as a credible supplementary measure to the risk based capital requirements. The Basel III leverage ratio is defined as the ratio of capital measure (the numerator) to exposure measure (the denominator), expressed as a percentage.

The capital measure used for the leverage ratio at any particular point in time is the Tier 1 capital measure applying at that time under the risk-based framework. Total exposure measure is the sum of the on-balance sheet exposures, derivative exposures, securities financing transaction (SFT) exposures and off- balance sheet (OBS) items.

Leverage ratio =  $\frac{\text{Capital Measure (Tier 1 Capital)}}{\text{Exposure Measure}}$

As on 31.03.2018

Amount in ` million

Tier 1 Capital	58001.1
Exposure Measure	947845.5
Leverage Ratio	6.12%
