

Basel-III --- Pillar-3 disclosures as on 30.06.2014

Name of the head of the banking group to which the Framework applies.	Jammu and Kashmir Bank Ltd
---	----------------------------

Jammu and Kashmir Bank (J&K Bank) is a commercial Bank that was incorporated on October 1, 1938. J&K Bank is the only state-government-owned scheduled commercial bank in India.

Table DF - 2 : Capital adequacy;

1. Qualitative disclosure

1.1 A summary discussion of the bank's approach to assessing the adequacy of its capital to support current and future activities.

- i) The Bank is subject to Capital Adequacy guidelines of RBI, which are based on the framework of the Basel Committee on Banking Supervision. These guidelines on Basel III have been implemented on 1st April 2013 in a phased manner. The minimum capital required to be maintained by the Bank for the quarter ended 30th June, 2014 is 9 percent with minimum Common Equity Tier 1 (CET1) of 5 percent.
- ii) The Bank carries out its capital requirement through a comprehensive projection of future businesses that takes cognizance of the strategic intent of the Bank, profitability of particular businesses and opportunities for growth. The proper mapping of credit, operational and market risks to this projected business growth enables assignment of capital that not only adequately covers the minimum regulatory capital requirement but also provides headroom for growth. As part of the Internal Capital Adequacy Assessment Process (ICAAP), the Bank also assesses the adequacy of capital under stress conditions to ensure that bank has adequate capital to support not only the three primary risks of credit, market and operational risk but other residual risks like interest rate risk in banking book, liquidity risk, credit concentration risk, strategic risk and reputational risk.

Risk Exposure and Assessment

Objectives and Policies

Organisational Structure---- Risk Management

The business of financial intermediation undertaken by the Bank requires it to identify, measure, control, monitor and report risks in an effective manner. The key components of the risk management at the Bank rely on risk governance architecture, comprehensive processes and internal control mechanism based on approved policies and guidelines. The risk management system is overseen by Board of Directors, with Integrated Risk Management Committee (IRMC), a board level sub-committee entrusted with the overall responsibility of ensuring that adequate structures, policies and procedures are in place for effective monitoring and control. IRMC is supported by three separate Executive level Committee (ALCO) and Operational Risk Management Committee (ORMC) to ensure effective management of credit, market and operational risks respectively. The committees are assisted by risk management support groups for credit, operational, market and liquidity risks.

Table DF – 3: Credit Risk

General disclosures --- Credit Risk

Credit Risk is the possibility of loss that a bank may be subjected to, on account of changes or deterioration in the credit profile / credit quality of borrowers and counterparties. The Bank is exposed to credit risk through lending and capital market activities. The Credit Risk Management Policy aims at ensuring sustained growth of healthy loan portfolio while identifying and managing credit risks, both at transaction and portfolio levels. This entails striking a balance between risk and return, thereby ensuring optimization of values for all stakeholders and at the same time striving towards maintaining / increasing the bank's market share.

The Bank manages its credit risk through following strategies:

- a) Well defined credit risk management structure to identify measure, monitor and control / mitigate credit risk from loan origination to disbursement and post disbursement monitoring has been laid out.
- b) Credit Risk Management Policy lays down the roles and responsibilities, risk appetite, key processes and reporting framework. Credit Risk Mitigation and Collateral Management Policy detailing various tools for credit risk mitigation are prudently followed.
- c) Board approved Investment Policy of the Bank addresses credit risks related to investment activities undertaken by the Bank, prescribing prudential limits, methods of risk measurement and hedges required in mitigation of risks arising in investment portfolio.
- d) Corporate credit is managed through rating of borrowers and thorough risk vetting of individual exposures at origination and thorough periodic review after sanctioning. Retail credit to individuals and small business is managed through definition of product criteria, appropriate credit filters and subsequent portfolio monitoring.
- e) Industry wise segment ceilings on aggregate lending by the Bank.
- f) Individual borrower wise ceilings on lending as well as borrower group wise lending ceilings linked to the Bank's capital funds.
- g) The Bank has rating tools specific to market segments such as large corporate, SME, financial companies, project finance etc to objectively assess underlying risks associated with such exposures. The credit rating models use a combination of quantitative and qualitative inputs to arrive at a 'point-in-time' view of diverse risk factors of counterparty and also for taking credit decisions in a consistent manner.
- h) Allowing credit exposures as per the credit rating of borrowers upto defined thresholds of risk levels. The approach also includes diversification of credit portfolio rating

category wise but within the acceptable risk parameters.

- i) The Bank's entire current business is within India and hence there is no geographic ceiling on lending in India or outside India. Further, there is also no ceiling on lending within a State in India.
- j) A mechanism of clear and well defined delegation of authority operates within the Bank in regard to decision making, which links risk and exposure amount to level of approval.

k) Regular review of all credit sanctioning powers delegated to various sanctioning levels so as to continuously strengthen the credit processes, and monitoring oversight are undertaken.

I) Approval processes with respect to credit proposals are preceded by study of risks and preliminary due diligence particularly while sourcing fresh credit accounts.

m) Credit audit system and loan review mechanism function independently of the credit processing / credit approval system and ensure effective loan monitoring, management / mitigation of credit and operational risks in the loan portfolio.

1. Qualitative Disclosures: The general qualitative disclosure requirement with respect to credit risk including:

1.1.1 Definition of NPA and impaired account

An asset including a leased asset becomes non-performing when it ceases to generate income for the bank. A non performing asset (NPA) is a loan or an advance where:

- a. Interest and/or installment of principal remain overdue for a period of more than 90 days in respect of a term loan
- b. The account remains 'out of order' as indicated in paragraph 1.1.2 below, in respect of an Overdraft / Cash Credit (OD/CC)
- c. The bill remains overdue for a period of more than 90 days in case of bills purchased and discounted
- d. The installment of principal or interest thereon remains overdue for two crop seasons for short duration crops
- e. The installment of principal or interest thereon remains overdue for one crop season for long duration crops.
- f. In respect of securities, where interest/principal is in arrears for a period of more than 90 days.

An account is also classified as NPA if the interest due and charged during any quarter is not serviced fully within 90 days from the end of the quarter.

1.1.2 'Out of Order' status: An account is treated as 'Out of Order' if the outstanding balance remains continuously in excess of the sanctioned limit / drawing power. In cases where the outstanding balance in the principal operating account is less than the sanctioned limit / drawing power, but there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not sufficient to cover the interest debited during the same period, these accounts are treated as "out of order".

1.1.3 Overdue: Any amount due to the bank under any credit facility is 'overdue' if it is not paid on the due date fixed by the bank.

1.2 Discussion of the bank's credit risk management policy.

The credit risk management policy of the bank aims at ensuring sustained growth of healthy loan portfolio while evolving a well- defined system to identify measure, monitor and control various risks attached to credit portfolio of the Bank. This entails reducing exposures in high risk areas, concentrating more on the promising industries / sectors / segments, striking balance between risk and return on assets and ensuring optimization of stakeholders value. The policy also seeks to achieve prudent credit growth –both qualitative and quantitative- while adhering to the prudential norms with balanced sectoral deployment of credit to control credit concentration across Industries, sectors, segments and at the same time increasing the market share. The policy also aims at ensuring consistency and standardization of credit practices. There is a defined credit appraisal & credit approval authority, reporting cum monitoring / follow-up system and loan review mechanism/ credit audit system in place at the Bank.

Table DF – 4 : Disclosure for portfolio subject to Standardised Approach

1. Qualitative Disclosure	S:							
1.1 For portfolio under the standardized approach:								
 Names of credit rating agencies used, plus reasons for any changes. 	• The Bank's exposure being mainly domestic, rating agencies like CARE, CRISIL, ICRA, FITCH India, Brickwork Ratings and SMERA have been identified for rating of exposure as per RBI guidelines. Designated rating agencies are used irrespective of types of corporate exposures.							
 Type of exposure for which each agency is used. 	• For exposures with a contractual maturity of less than or equal to one year (except cash credit, overdraft and other revolving credits), short-term ratings given by approved rating agencies are used. For cash credit, sanctioned overdrafts and other revolving credits (irrespective of the period) and for term loan exposures of over one year, long term ratings are used.							
A description of the process used to transfer public issues rating onto comparable assets in the banking book	 Public issue ratings are used for comparable assets of borrower in the banking book as follows: - i) In cases where the borrower has a specific assessment for an issued debt - but the bank's claim is not an investment in this particular debt - the rating applicable to the specific debt (where the rating maps into a risk weight lower than that which applies to an unrated claim) is applied to the bank's unassessed claim if the Bank's exposure ranks <i>pari passu</i> or senior to the specific rated debt in all respects and the maturity of the unrated claim. i) If either the issuer or single issue has been assigned a low quality assessment which maps into a risk weight 							

equal to or higher than that which applies to unr claims, an unassessed claim on the same counterp that ranks pari-passu or is subordinated to the r exposure is assigned the same risk weight as applicable to the low quality assessment.
